
NATIONAL UPDATE 2011-01 As of April 27, 2011

As the Local is within the window to file to bargain, we have done so. This essentially means that all FSS terms and conditions of work are frozen until the process is complete.

The Local intends to discuss possible scenarios and approaches in this round of bargaining with the convention delegates at the upcoming Triennial L2245 Convention.

The Company has advised that the new rates of pay should appear on the May 25 payday. Due to complications, the Company will advise when the retroactive calculations are complete and ready for distribution. As in the past, members will be able to have these retroactive payments deposited directly into RRSPs.

The Office of Safety and Quality will be distributing a SMS safety survey to the membership in the next couple of months. We encourage all members to complete and submit this survey.

The cyclical review for the Travel Program (Guideline) of the NCJC has begun. Please submit your Input (demands) for additions, deletions or amendments to this program to Jim Nauss (caw2245pac@telus.net) no later than May 15, 2011.

The Executive Board – Air Traffic Specialists Local 2245 CAW-Canada
